## QUARTERLY DEEP DIVE

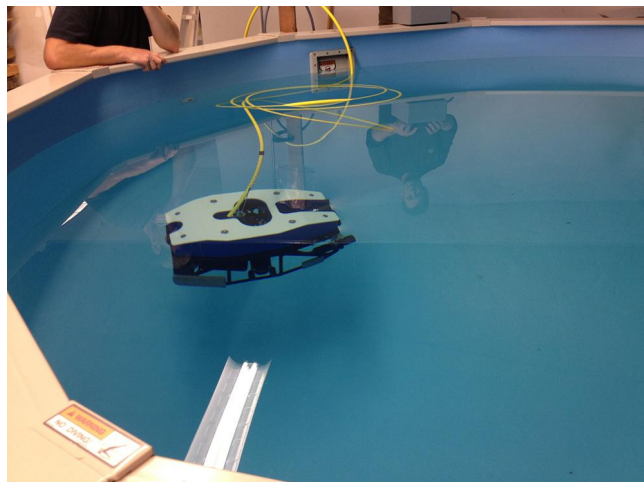

### GRAND COULEE T5 SALE

We're starting the year off fast with an order from the Bureau of Reclamation at Grand Coulee Power Station for a Phantom T5. Grand Coulee is the biggest of four powerhouses located at Grand Coulee Dam, Washington. The plant generates an average of 21 billion kWh per year, a third of that being hydropower and two thirds of it being from the power plant. It was the largest hydro power plant in the world when it went into service in 1980. Our Phantom T5 will be built and customized to their needs: multi-beam sonar, measuring lasers, five function electric manipulator, USBL tracking, altimeter, two continuous live-feed cameras, and 400m all copper umbilical. We're excited to build such an fitted vehicle!

### SERVICE TRIP

#### Starting Off the New Year with a Trip to Virginia

Our sales technician, Darrell Martin, traveled in support of North Anna and Surry power plants in early January with a trip to Virginia. North Anna and Surry power plants are responsible for powering over 450,000 homes in Louisa and Surry county, using Lake Anna and James river as its water coolants. Both plants share three Phantom P150s which are used in outage support and tank inspections.

The goals of the trip were: a tune up/calibration of the customer's new Phantom P150, repairs to in-service Phantom P150, identify valuable spare parts from out-of-service P150, and personnel training. The P150 in need of servicing minor motor issues and thrusters that weren't spinning properly due to years of usage. With some help from Darrell and the plant team, they were quickly able to fix the issues and get the ROV up and running again.

Darrell successfully completed the trip, leaving both plants even more satisfied with their vehicles. Deep Ocean vehicles are built to last and our customer service for them is unmatched. To find out more on our vehicles, check out our [website](#).

## HYDROVISION INTERNATIONAL

Hydrovision 2021 was unfortunately cancelled and rescheduled to July 12 - July 14 of 2022 due to the pandemic. Deep Ocean will be attending this year so come check us out at booth 613! Hope to see you there!

### Have a Deep Ocean Engineering ROV or USV?

#### Support Team

We provide a lifetime of dedicated customer service and support. Contact our support team for field assistance, spares/repairs, or upgrades and technical support.

Submit photos or videos of your Phantom ROV or USV to get a special mention by DOE!
